## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 17 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted Prior Art, figure 1 of the drawings and their respective areas of the specification (Hereinafter after "Prior Art").

As per claims 17 and 20, Prior Art teaches an apparatus for graphics processing (Fig. 1) comprising a compiler (102) coupled to receive abstract state vector (104) having an abstract render state 106, vertex shader programs 108, vertex shader constants 110, pixel shader programs 112 and pixel shader constants 114 and the compiler (102) generates a hardware state and shader vector (100) and is provided to a hardware 116, (such as, graphics processor). It is noted that the prior art fails to mention what is the element of dot line block box which includes all elements 106-114 and generating or outputs the abstract state vector 104 as shown in the drawing. However, it would have been obvious to one of ordinary skill in the art at the time the present invention was made to reasonably believe the dot line box must be some kind of a storage device, such as, a cache, a register, a buffer, a table, or a memory, in order to store or output to the compiler. Therefore, at least claims 17 and 20 would have been obvious.

***Allowable Subject Matter***

3. Claims 1-16 are allowed.
4. Claims 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specially, the prior art fails to teach or suggest, in combination with the remaining steps and/or elements, a method comprising a determining steps as recited in claims 1 and 12; and a graphics processor comprising at least one state and shader cache and an abstract state vector register as recited in claims 18 and 20.
